For excellent primary insulation and moisture protection

Scotch[®] Tape 23

Rubber Splicing Tape

Choose Scotch[®] Rubber Splicing Tape 23 for insulating, splicing, and padding low- to high-voltage cables, especially in outdoor or underground applications. Adding rubber tapes to your toolbox can help reinforce your work for years of maintenance-free service.

Outdoor or Underground

Moist and Corrosive Environments

Self-Fusing and **Excellent Stretch**

Product Highlights:

- Primary insulation for splicing all types of solid dielectric insulated cables through 69 kV
- Self-fusing material provides immediate moisture seals and void-free build-ups
- Removable liner protects from dust and dirt during installation
- Rated for 90°C continuous operating temperature and overload temperatures up to 130°C
- Compatible with common, solid dielectric cable insulation
- Provides extra padding and highly conformable for irregularly-shaped objects
- Weather resistant

Important Notice

Before using this product, you must evaluate it and determine if it is suitable for your intended application. You assume all risks and liability associated with such use.

Clean, **Removable Liner**
